Profile

Highly motivated and creative recent graduate with a strong foundation in web design principles and a passion for crafting user-friendly, visually appealing websites. Proficient in HTML, CSS, and JavaScript, with a keen eye for detail and a commitment to creating responsive designs that function flawlessly across all devices. Eager to learn from experienced professionals and contribute to a team environment.

Education

BE Computer Science

Anjalai Ammal Mahalingam Engineering College, Thiruvapur

Projects

Movie Site

Developed a dynamic movie website using HTML, CSS, and JavaScript. The website utilizes a free movie API to search for movies and display their release dates. Users can create personalized movie lists by adding favorites and viewing them in a dedicated section. Additionally, the website allows users to remove movies from their favorites list.

Calci with History

Built a functional calculator web application using HTML, CSS, and JavaScript. This calculator offers basic mathematical operations and includes a valuable history feature that tracks and displays recent calculations. This functionality allows users to easily review past calculations and improves overall usability.

Blood Donation Management

Developed a Blood Donation Management System Android app using Java and XML in Android Studio, with Room as the database. This app facilitates user registration, real-time tracking of blood availability and notifications. The project honed my skills in mobile app development, Java programming, and database management, showcasing my ability to create efficient and user-friendly solutions.

Food Rescue App

Developed a user-friendly mobile application to bridge the gap between food waste and food insecurity. This Android app, built with Firebase for real-time data management, connects individuals and organizations with surplus cooked food to those facing food shortages within their communities.
